<abstract>
  <gco:CharacterString>Digital Elevation Model with cell size of 10m for the Upper Austria, Austria.
</gco:CharacterString>
</abstract>
<purpose>
  <gco:CharacterString>Digital Elevation Model of Upper Austria serves as a representation of height values
  to be analyzed. Furthermore, it serves as a base layer for deriving other qualitative features for the
  investigated area, such as steepness and orientation of the terrain. </gco:CharacterString>
</purpose>
